

Extra Bonus Opportunity

Feb/28/2022

In this extra bonus opportunity, please start to draft the **reflections for your learning experiences** you have had for the

- (1) In class learning such as answering questions, how many you have answered? What you have learnt from those?

Talking to you after class and over email has helped me a lot. It keeps me interested and I like how you care. I look forward to working on a project outside of class with you.

- (2) Learn from the posted videos, what you have learnt from those videos?

I have learned how to work through the problems and learn what to look for while problem solving.

- (3) Any extra learning resources you have found helpful for you, such as from a Youtube Video, a Blog? Let me know those.

I have watched youtube videos, whatever ones pop up that are short and explain things fast. I also used the RMS equation in circuits 2 today.

- (4) *Provide me some feedback for how to make our class better, any feedback will be highly appreciated to make sure you are successful for our class.*

Working through problems is how I learn the best. Chipping away a little bit at a time and really working through each problem helps me the most. I like the quiz questions too, I would be appreciative if the next quiz was longer and maybe even more similar to the test, or have a quiz in a few weeks before the test, so that I know if I am keeping up with the class. I enjoy having you as a teacher.
